

Moon Base Explorers Program Info

Welcome to the Moon Base Explorers Program! This hands-on, immersive STEM experience gives your students early exposure to multiple science standards, as well as a chance to work cooperatively to explore space in a fun and exciting new way.

The Moon Base Explorer Program lasts 2 hours. Your students will spend time in both our Apollo Early Learners Room and in our Planetarium. To make this an educational and enjoyable experience for all, here are a few things that **MUST** be done for your mission:

- Fill out the Moon Base Explorers Crew Manifest and have it ready when you arrive.
- Bring 5 adult chaperones PER CLASS (typically 1 GROUP OF 25 STUDENTS), not including the teacher(s), to act as the Mission Specialists. The success of the mission relies heavily on the Mission Specialists' guidance through tasks and activities.
 - *Any group larger than 30 students requires the booking of a second program.*
- Share the Mission Specialist Information Sheet with your chaperones.
- Arrive no earlier than 10 minutes prior to your scheduled Moon Base Explorers program time.
- Plan to have your students use the restroom before your scheduled start time. There will be a restroom break halfway through the program, but that is after 1 hour of activities.
- Please refrain from cell phone usage and text messaging during the program, as the students require assistance throughout the whole program.

Thank you in advance for your preparation and participation in this program. We are looking forward to seeing you and your crew of young astronauts!

If you have any questions before your program, please contact Lead STEM Educator, Valerie Hunter, at hunter@clcnwi.com, or call our office at (219) 989-3250.
