

On The Move

Students Information:

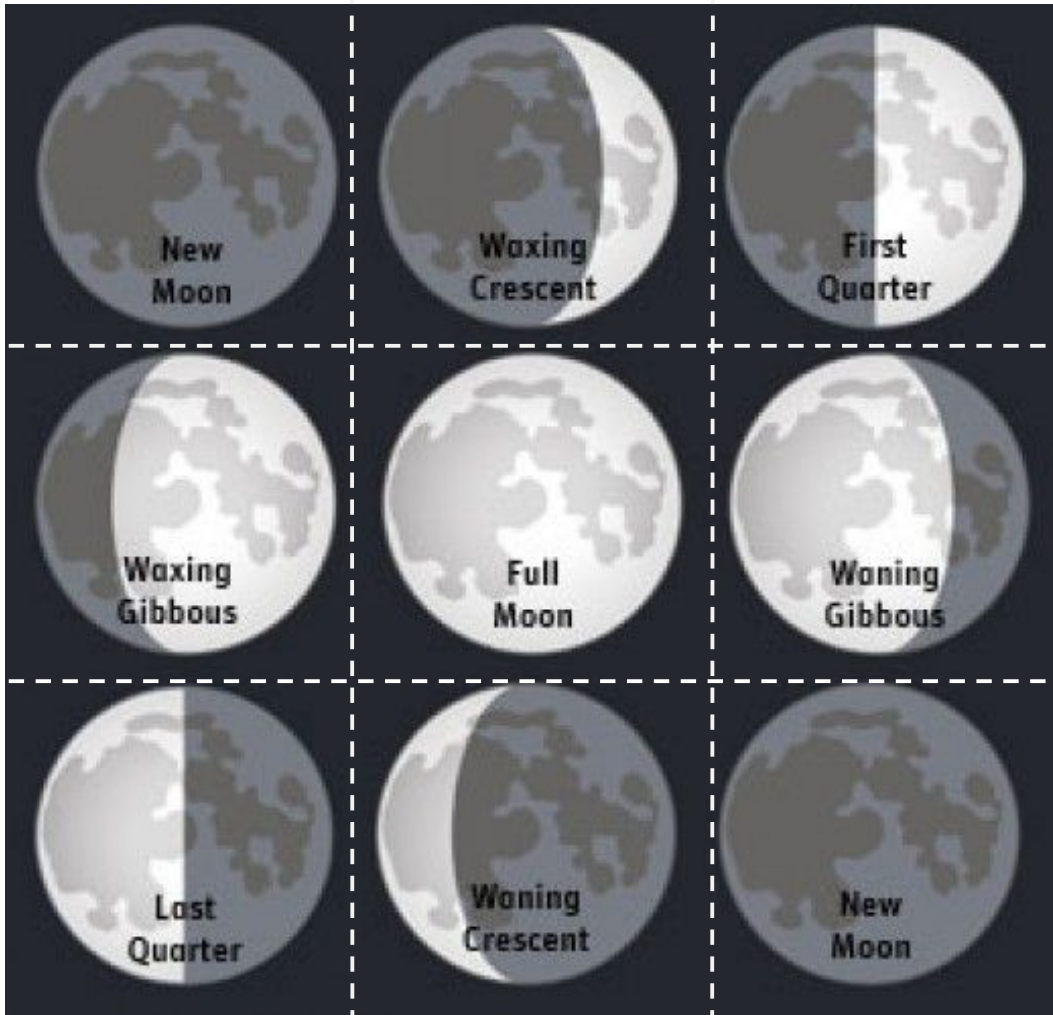

Our moon has 8 different phases. Cut out and glue the correct phase of the moon in order around the earth. The following page provides answer key cutouts. Then, in your own words, write below why you think the moon has so many different phases. Why doesn't it just stay the same all the time?

Moon Phases:

On The Move

Answer Key Cutouts: (you only need to use one new moon below)

Why does the moon have different phases?
